For more products connecting science and math to the real world, follow us at our TpT store! We hope our products can vivify your STEM teaching!

ABOUT THIS ACTIVITY

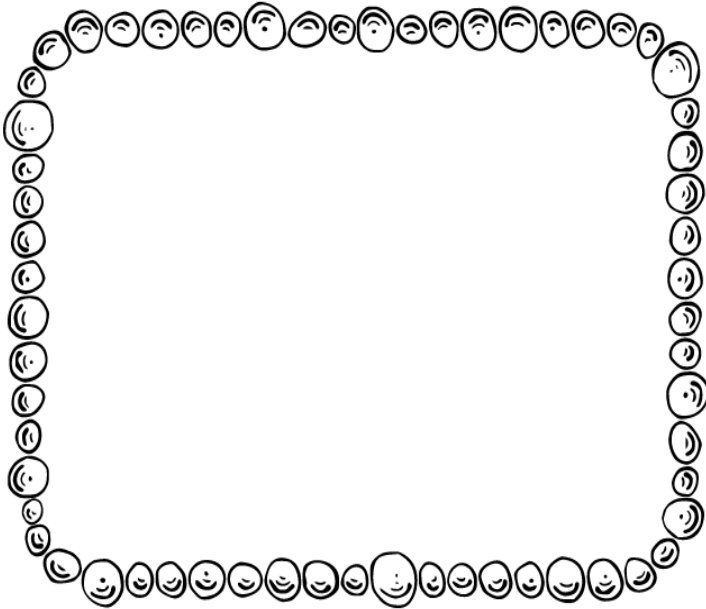

The following STEM activity is a great way to incorporate STEM into your classroom. Use this as an assignment or warmup during class time! You may expand upon this activity by asking the students to choose one of the 4 categories and write about how the STEM they are thankful for may be improved or utilized in the future.

Thankful For STEM

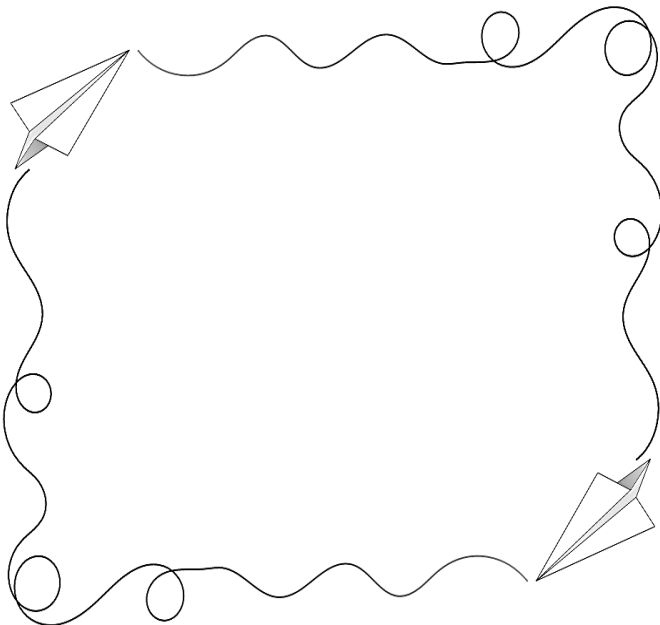

Students will use critical thinking skills to draw or write what they are thankful for in each of the 4 sections – Science, Technology, Engineering, and Math. Have each student share their list when complete.

I AM THANKFUL FOR STEM

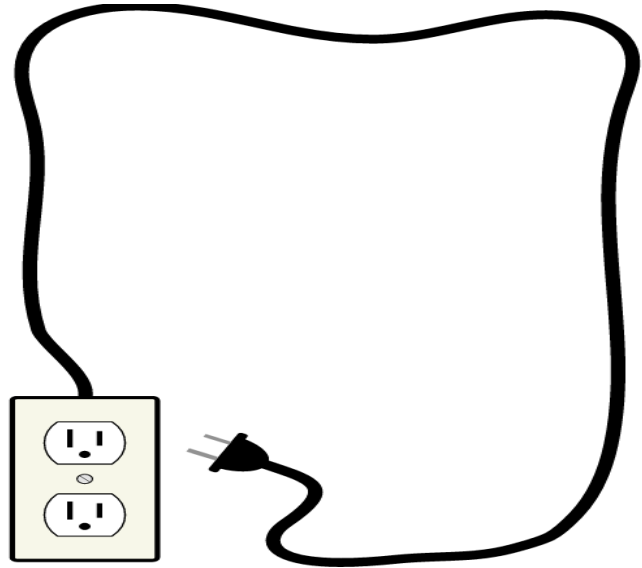

Thanks to **science**, we know why a lot of things are the way they are. What scientific knowledge are you thankful for?

Engineering has improved so many things we use every day. What are you thankful for that engineers have made better?

We use **technology** to do many things faster or have access to things we could not otherwise see. What technology are you thankful for?

Math is used by everyone from cooks to carpenters! What do you do that makes you thankful for math?
